

Amendment To The Specification

Page 30, lines ~~13-22~~^{29 through Pg 31, line 7}, please replace the paragraph with the following:

B1

An exterior "on/off" switch is turned on to begin the fabric refreshment process. The switch is connected to a programmable microprocessor that controls the multi-step process. First, the ultraviolet lamp is turned on to produce ozone. The lamp remains lit for approximately 10 minutes. The fan is running at half speed during this first step. For the second step, the ultraviolet lamp (ozone source) is turned off, the temperature is raised to about 50°C and the relative humidity is raised to greater than about 75%. This is accomplished through the introduction of the ~~vaporized~~ nebulized cleaning and refreshment composition that is ~~vaporized~~ nebulized by the ultrasonic nebulizer. This second step lasts for about 7 to 12 minutes.
